SUMMARY

I am an experienced developer skilled in Flutter, React JS, PHP, and native development, with expertise in backend technologies like Node.js, .NET Core, PHP, and ServerPod. I specialize in building cross-platform apps that balance aesthetics and functionality. A lifelong learner, I stay current with trends to design dynamic, future-proof systems. Collaborative and team-oriented, I drive projects from concept to completion.

WORK EXPERIENCE

Fullstack Developer, Webrange Solutions   **Jun 2024 - Present**

- Developed and deployed full-stack applications, ensuring seamless integration between mobile application and back-end systems.
- Designed and implemented responsive user interfaces, enhancing user experience and engagement across various platforms.
- Engineered scalable backend systems, optimizing database queries, API integrations, and overall application performance.

Mobile Application Developer, KNS Technology   **Sept 2023 - Jun 2024**

- Developed user-centric mobile applications that contributed to KNS's growth and client success, focusing on functionality, performance, and scalability.
- Enhanced application performance through meticulous code optimization and implementation of best practices, leading to smoother user experiences.
- Delivered high-quality apps within tight deadlines, consistently meeting client expectations and contributing to the company's reputation for excellence in mobile development.

Mobile Application Developer, FIT Computer Institute   **May 2022 - Sep 2023**

- Developed user-centric mobile applications that contributed to KNS's growth and client success, focusing on functionality, performance, and scalability.
- Enhanced application performance through meticulous code optimization and implementation of best practices, leading to smoother user experiences.

EDUCATION

Bachelor of Science in Computer Science   **2019 - 2024**

- Barani institute of information technology (PMAS) Rawalpindi

CERTIFICATES

AI workshop of machine learning   **2022**

Fast Mobile App Development Competition   **2023**

KEY SKILLS

- Flutter
- React Native
- React JS
- C++
- C#

- PHP
- Net Core
- Nodejs
- Web
- OOP

PROJECTS

Legend Territory (Flutter)   Present
- Social application, having features of adding posts
- Enables users to add songs to a video, apply filters on images and videos.

Torch (Flutter)   2024
- Multi-venders Ecommerce application.
- Implemented Stripe + Google pay + Apple pay + Paypal as payment gateways.

Programming Competition (Flutter + Laravel)   2024
- Created a programming competition app for handling university programming society quiz competitions.
- Enables Host, Audience and competitors to view and handle competition in real time.

FataFat food delivery (Flutter + Laravel)   2024
- Developed a full food order and delivery setup.
- Developed admin panel in laravel and user, seller and Rider applications.

Brain Boost (Flutter)   2024
- Created an AI-powered chat application featuring both text and image generation functionalities.
- Ensured the app's AI algorithms were robust and responsive, providing users with dynamic and accurate outputs.

Sasti-Khareedari (Flutter + Laravel)   2024
- Developed an eCommerce application focused on delivering an optimal shopping experience for users.
- Integrated advanced search and filter options, improving user engagement and ease of product discovery.

Meego (Flutter)   2024
- Developed a full service booking setup.
- Developed admin panel in .Net and user, vender app applications.

Miyar (User + Selller + Rider)   2023
- Developed a multivendor eCommerce platform offering users a comprehensive shopping experience.
- Integrated multi-role functionalities for users, sellers, and riders, ensuring smooth operations across all fronts.

BIIT Social App (Flutter + .Net Api)   2023
- Created a platform providing teachers, students, university admins a way to communicate, share thoughts, announcements etc.
- Enables students, teachers to view their timetables, duties and datesheets etc.

Booking Scoot (Flutter)   2022
- Online booking scoot
- Enables users to book hostels and hotels rooms.
